Subject: September 21st Water Conservation Community Outreach Meeting

On Monday September 21, 2015 at 6:30PM, the Town will be hosting a public outreach workshop at Community Hall. This is an important part of our water conservation efforts and we are excited to have exceptional individuals join us to talk about how residents can increase their conservation.

The meeting will include Pat Costello, the Town's Cash for Grass liaison from the City of Napa. Pat has helped numerous residents utilize the Cash for Grass rebate program. We are also lucky to have Lori Cagwin, Certified Landscape Architect of over 25 years, speak about how residents can transform their lawns using drought tolerant plants. Need better irrigation for the plants that do need water? Chris McNairy from Hunter Irrigation will answer questions about the importance of effective irrigation.

Additionally, Town staff including Joe Tagliaboschi, Public Works Director and Steve Rogers, Town Manager will be present to talk about how the Town's conservation efforts have decreased our water usage. This is a great opportunity for residents, contractors and gardeners to come and engage with our speakers!
