**Subject:** Town Launches New Website

The Town of Yountville is pleased to announce the launch of our new website. Our website has been designed to provide expanded content and useful information that is much easier to navigate and provides up-to-date information about Town issues and activities.

Additionally, the website includes new features such as eNotify which will give you the opportunity to subscribe to specific information such as media releases, Town Council meeting agendas, ZDRB meeting agendas, Parks and Recreation information and more. This information will then be automatically sent to you as new information is posted. Should you want to make a service request? Just click on our "Service Request Form" located under our departments tab and submit electronically.

By visiting the various departmental tabs, you will find most forms that you will need, such as tree removal permits, encroachment permit applications, business license application, employment applications, to name a few.

We are excited to announce that as of March 1, 2011, you will be able to pay your utility bill online.

We encourage you to visit [www.townofyountville.com](http://www.townofyountville.com) and explore the new site and take a moment to fill out our website survey and provide us your feedback. We welcome all comments and or suggestions.

**### END ###**
