Subject: SLURRY SEAL PROJECT 2011 (ST-3011 AND WW-003)

Graham Contractors Inc. has rescheduled to Wednesday, October 19, 2011, the construction of slurry seals along the following Town streets:

- Mesa Court
- Forrester Lane
- Lande Way (eastern portion)
- Mount Avenue (eastern portion)
- Redwood Drive
- Foxglove Lane
- Jasmine Street

In addition, the pavement of the Town Corporation Yard and the Joint Treatment Plant will be slurry sealed on Saturday, October 22. Slurry sealing will protect and extend the service life of the streets, improve safety, and provide a smooth crack free surface.

On October 19, 20 and 21, the contractor will arrive in Town, set up, perform pavement cleaning and preparation, and begin work along the above named streets. The contractor will provide notification of the street closures in advance of the work. The project should be completed by October 30, weather permitting.

This project is funded by the Gas Tax Fund and the Joint Wastewater Treatment Plant Capital Improvement Fund, and has a contract amount of \$83,143.50. If you have any questions, please contact Graham Wadsworth, Town Engineer at 944-8851, who is supervising this work.

END
