**Subject: Microsurfacing Improvements To Begin November 8, 2016**

Due to the rainy weather over the past few weeks, the Town has postponed the microsurfacing project. With clear weather in the upcoming forecast, the Town has made the decision to begin the project starting on Tuesday November 8, 2016.

Microsurfacing improves the surface of the roadway and also extends the service life. This work will be completed by Tefler Pavement Technologies as warranty repair work for the microsurfacing project that was completed in 2015.

Barricades indicating "no parking" will be set up and door hangers will be distributed 72 hours prior to the work being performed for residents living on Humboldt, Oak Circle, Oak Leaf Court, Harvest Court, Heritage Way and Heritage Court. Once applied, the microsurfacing could require up to 6 hours to set, during which time traffic and parking will be prohibited.

We apologize for the inconvenience, and thank you for your cooperation. Microsurfacing allows the Town to preserve and maintain streets.
