Subject: Please Help Us Keep Yountville and Our Streams Clean

In an effort to keep the Town clean and to comply with storm water regulations set forth by Phase II of the Bay Area Storm Water Management Association and the Town's NPDES (National Pollutant Discharge Eliminating System) permit, we are asking residents, employees of local businesses and visitors to please keep all trash and recycling off the ground and in the designated trash or recycle can. This includes cups, napkins, wrappers and cigarette butts.

Thank you for your cooperation! By keeping the storm drains clean, the water that empties from Hopper Creek to the Napa River and the San Francisco bay will be clean too!

For your convenience, the Town has placed new trash cans at the intersection of Yount Street and Finnell Road.
